Skills:

Leadership and Teamwork:

As a Leader, I played a major role in organizing and running the Google Women in Technology Ambassadors team in canal Cities. I help select the team members and launching events and workshops. In addition, I currently work as manager of Google Business Group in Ismailia to help creating value for local businesses through interacting and learning with the local community.

Problem Solving:

Working in systems design, analysis and programming requires analytical, numerical and problem solving skills. I first developed these skills during my work period in the AGSoft Company where I worked closely with staff to define the requirements and then designed a computerized systems for school.

Interests/Activities:

I have participated in art activities at school, city level like drawing and playing on Piano. In warmer weather I like swimming and trying out different water games. I like cooking. And I also enjoy reading and I have voluntarily helped with the organizing many public reading events.
